PROFESSIONAL SUMMARY

Final-year undergraduate student pursuing a Bachelor's Degree in Administrative Information Systems, with a strong passion for Business Intelligence and Cybersecurity. Proficient in Java, Python, and R programming languages, with experience managing both relational and non-relational databases. Skilled in data analysis tools such as Power BI and foundational knowledge in Tableau. Experienced in building ETL processes for cleaning, transforming, and integrating data from multiple sources. Advanced knowledge in SQL for data extraction and analysis. Hands-on experience in generating interactive dashboards and actionable business insights. Strong team player with innovative thinking, analytical skills, and problem-solving abilities. Actively seeking an opportunity to apply and expand knowledge in a professional environment.

EDUCATION

UNIVERSIDAD DE GUANAJUATO
Bachelor's, Administrative Information Systems

August 2021 - Present

PROFESSIONAL EXPERIENCE

CEVA Logistics
Business Process Excellence Intern

Monterrey, México
August 2025 - Present

- Built and maintained 3 Power BI dashboards for operational KPIs, headcount, and financial tracking, improving stakeholder visibility and reducing reporting turnaround time from 1–2 days to same-day updates.
- Created dashboards to track +400 continuous improvement/innovation ideas, helping prioritize initiatives with stakeholders across 11 teams.
- Automated 3 recurring reporting and data refresh workflows using Power Automate, reducing manual effort by ~8-10 hours per week and minimizing refresh errors.
- Developed internal apps with Power Apps to streamline data capture and standardize processes across teams.
- Implemented Excel-based data connections and integrations to consolidate inputs, ensure consistency, and support reliable reporting.

ACADEMIC EXPERIENCE

Data Analysis and Visualization

- Built interactive dashboards in Power BI to support data-driven decision-making.
- Applied data analysis techniques using Python (Pandas, NumPy, Scikit-learn) and R (RStudio) for statistical analysis and visualization.
- Developed clear and dynamic presentations of insights using Tableau (basic level).

Database Management

- Designed and implemented databases using SQL and MariaDB.
- Optimized and executed complex queries for data extraction and analysis.
- Managed ETL processes for cleaning, transforming, and integrating data from multiple sources.

Application Development

- Developed applications in Java, Python, and R to solve business-related problems.
- Integrated data analysis models into interactive applications for actionable business insights.
- Generated customized reports with JasperReports from structured datasets.

CERTIFICATIONS

EF SET - English Certificate (C1 Proficient)

ADDITIONAL SKILLS

Python: Data analysis and modeling with Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, and Plotly.

R (RStudio): Statistical analysis, data cleaning, and visualization.

Power BI: Creation of interactive dashboards and data-driven visualizations to support decision-making.

SQL & MariaDB: Database design, optimization, and complex queries for data analysis.

ETL Processes: Cleaning, transforming, and integrating data from different sources.

Tableau (basic): Clear and dynamic presentation of business insights.

SharePoint: Site/content management, lists & libraries, and collaboration workflows.

Power Apps: Development of internal apps to streamline data capture, standardize processes, and support operational workflows.

Power Automate: Automation of recurring tasks and approvals, notifications, and data flow integrations (e.g., Excel/SharePoint) to reduce manual work.

Languages: Spanish (native), English (professional)
